

Neval Babu

Right to Work: UK (No sponsorship required) | Leicester | 07459875933 | Neval271@gmail.com |

Portfolio: <https://neval-babu-portfolio.netlify.app>

SKILLS

Python, Java, C++, JavaScript, HTML, CSS, REST APIs, Spring MVC, Postman, Swagger, Android Studio, SQL, Git, Agile, SDLC, Shell Scripting, Object oriented, UnitTesting, PostgreSQL, Prisma, TypeScript

EDUCATION

BSc (Hons) Computer Science | University of Leicester | First Class Honours (76+ %)

PROJECTS

IBM SkillsBuild Companion App

- Developed a gamified web application for IBM SkillsBuild within an 8-member team to create a more engaging learning experience
- Built backend services using Java and Spring Boot, implementing REST APIs to handle business logic and application functionality
- Configured a MySQL relational database for secure data storage and structured user management
- Led the Agile development process as Scrum Master, coordinating sprint activities and team progress to ensure project milestones were met
- Applied Spring Security to support secure authentication and controlled access to application features
- Utilised GitLab for version control and collaboration, supporting efficient teamwork and maintaining code consistency

PitchBrief

- Developed a full-stack football news platform using React, TypeScript, Node.js, Express and PostgreSQL
- Implemented secure JWT authentication, protected API routes and bcrypt password hashing
- Designed relational data models using Prisma ORM and built RESTful CRUD APIs for favourite clubs and article bookmarks
- Integrated live football news from RSS feeds with scheduled background updates and unit-tested core functionality
- Deployed the frontend on Netlify and the backend API with PostgreSQL on Railway

Portfolio Website

- Developed a responsive personal portfolio using React, TypeScript and Vite to showcase my technical skills and software projects
- Built reusable React components for the Home, Projects, Contact and navigation sections
- Created responsive layouts with CSS media queries to support desktop, tablet and mobile devices
- Implemented interactive project cards with technology badges, conditional repository/demo links and a screenshot slider
- Used GitHub for version control and deployed the production website through Netlify

Private Cloud Whiteboard

- Distributed a shared, interactive whiteboard application across multiple Microsoft Azure App Service nodes
- Achieved persistent, low-latency connections by integrating Azure Web PubSub for WebSocket communication and Redis Cache for state synchronisation and rapid data retrieval
- Applied Docker containers to simplify horizontal scaling, allowing quick instance deployment during peak demand

Scrabble Game

- Built a modular desktop Scrabble game using Python, Pygame and object-oriented programming principles
 - Developed player-versus-player and player-versus-computer modes with easy, medium and hard difficulty levels
 - Integrated a DAWG data structure for efficient word validation and prefix-based dictionary searches
 - Implemented rule-validation algorithms for tile alignment, board connectivity, first-move placement and multiword formation
 - Optimised computer-opponent move generation by searching valid positions adjacent to existing tile
 - Developed configurable game and turn timers with automatic passing and final-score calculation
-

WORK EXPERIENCE

Amazon Warehouse Associate | June 2021 – Present

- Processed and organised shipments with accurate sorting, packing, and labelling to ensure efficient order fulfilment and workflow operations
- Applied strong attention to detail and adaptability to maintain quality in a fast-paced working environment
- Collaborated effectively with team members to support daily productivity targets and operational efficiency
