SKILLS

Python, Java, C++, JavaScript, HTML, CSS, REST APIs, Spring MVC, Postman, Swagger, Android Studio, SQL, Git, Agile, SDLC, Shell Scripting, Object oriented

EDUCATION

BSc (Hons) Computer Science | University of Leicester | First Class Honours (76+ %) | 2021–2025

PROJECTS

IBM SkillsBuild Companion App

- Developed a gamified web application for IBM SkillsBuild within an 8-member team to create a more engaging learning experience
- Built backend services using Java and Spring Boot, implementing REST APIs to handle business logic and application functionality
- Configured a MySQL relational database for secure data storage and structured user management
- Led the Agile development process as Scrum Master, coordinating sprint activities and team progress to ensure project milestones were met
- Utilised GitLab for version control and collaboration, supporting efficient teamwork and maintaining code consistency

University Timetable Management System

- Developed a timetable management system using Java, Spring MVC, and REST APIs, alongside an Android application built with Android Studio, Java, and RecyclerView, enabling the management of modules, sessions, and convenor data through an intuitive and user-friendly interface
- Utilised Swagger/OpenAPI and Postman for API documentation, integration testing, and validation of backend functionality

Private Cloud Whiteboard

- Distributed a shared, interactive whiteboard application across multiple Microsoft Azure App Service nodes
- Achieved persistent, low-latency connections by integrating Azure Web PubSub for WebSocket communication and Redis Cache for state synchronisation and rapid data retrieval
- Applied Docker containers to simplify horizontal scaling, allowing quick instance deployment during peak demand

Scrabble Game

- Developed an interactive Scrabble game using Python and Pygame, supporting both player-versus-player and player-versus-computer gameplay modes
- Applied object-oriented programming principles to design and manage core components including players, tiles, boards, and gameplay interactions
- Integrated DAWG-based word validation to efficiently verify word entries and maintain accurate gameplay functionality
- Implemented custom scoring and game logic systems to create a responsive experience and improve overall gameplay interaction

Discover Flavour Web Application

- Developed an interactive food discovery web application using HTML5, CSS3, and JavaScript to provide a responsive and engaging user experience
- Implemented DOM manipulation and dynamic client-side functionality to support interactive features and improve user navigation
- Applied form validation techniques to enhance data accuracy and create a more user-friendly experience

WORK EXPERIENCE

Amazon Warehouse Associate | June 2021 – Present

- Processed and organised shipments with accurate sorting, packing, and labelling to ensure efficient order fulfilment and workflow operations
- Applied strong attention to detail and adaptability to maintain quality in a fast-paced working environment
- Collaborated effectively with team members to support daily productivity targets and operational efficiency
